DETAILED ACTION

Claim 1 is pending in the instant application.

Abstract

1. Applicant is reminded of the proper content of an Abstract of the Disclosure.

In chemical patent abstracts for compounds or compositions, the general nature of the compound or composition should be given as well as its use, *e.g.*, "The compounds are of the class of alkyl benzene sulfonyl ureas, useful as oral anti-diabetics." Exemplification of a species could be illustrative of members of the class.

The abstract of the instant application is directed to the process of preparation of the instantly claimed 3-fluoroalkoxymethyl-3-alkyloxetane compound, which has been patented in the parent case of the instant divisional application. Therefore the Examiner has amended the abstract so that it corresponds with the instant claimed invention, which is the 3-fluoroalkoxymethyl-3-alkyloxetane compound.

Allowable Subject Matter

2. Claim 1 is allowable.
3. The following is an examiner's statement of reasons for allowance: This invention relates to a novel fluorooxetane compound according to Formula (Ia). The allowable claim in this case is claim 1, which is directed to a 3-fluoroalkoxymethyl-3-alkyloxetane compound. The instant application is a divisional of U.S. Patent Application 10/221,191, now U.S. Patent No. 6,673,947, in which the process of preparing the instant claimed compounds has been found allowable over the prior art. Oxetane compounds are known in the art as being suitable as intermediates for preparing various fluorine-containing polymers, however the aspect of

preparing the instant claimed fluorooxetane compound, with a fluoroalkyl ether bond that contains either a difluoromethylene or fluoromethylene group at the α -position, is novel and unobvious. After a thorough search, the closest of prior art, et al, GB 2269816A, was found to teach similar fluorooxetane compounds. However the GB Application fails to teach or render obvious the instant claimed 3-fluoroalkoxymethyl-3-alkyloxetane compound, since it does not fairly suggest a fluoroalkyl ether bond that contains either a difluoromethylene or fluoromethylene group at the α -position.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
